- WHO HE WAS IN 2026
- The sinker:** 93.5 (max 95.5), 6" IVB / 15" run, 2,190 rpm, 6.6 ft extension, 5.1 ft release from a 9.6° arm angle. 24% whiff on 67 AAA pitches – high for a sinker – but 40% zone.
  - The slider:** 82 (max 87 – two speeds), -2" / -10.5", 2,190 rpm. 67% whiff on 21 pitches, 29% zone. The 5-mph spread between average and max says it's two pitches right now.
  - Two pitches, 99% of the time.** Nothing arm-side offspeed, nothing up.

- Lefties are the hole:** .333 AVG at AA (141 PA), 28.6 BB% in the AAA sample. Righties: .220, 29.7 K%.
  - AA results say he's a big-league sidearmer already vs RHH:** 30.3% CSW, 27.7% whiff, 53.8% GB, 59% first-pitch strike.
  - The AAA line (13.50 ERA, 2 HR in 4 IP, 43.5% first-pitch strike) is 23 batters – noise, but both HR came on pitches in the zone.

OFFSEASON PLAN — WHAT WE FIX

every item is tied to a 2026 number; nothing gets credited until game data confirms it

MOCAP & DELIVERY

- Capture the slider at both speeds (82 vs 87) – the fast one is a cutter-slider, the slow one a sweeper; decide which is the pitch and lock the release.
- Sidearm delivery baseline: pelvis/trunk tilt, shoulder abduction – make sure the slot is sustainable across a 60-appearance season.
- Extension is 6.6 ft – protect it; anything that adds an arm-side pitch must come from the same release.

PITCH SHAPES & GRIPS

- Add the LHH pitch:** from 9.6° a changeup with 15"+ run off the sinker (84–86 mph) is the natural third pitch; alternative is a backdoor sweeper to LHH. Success = LHH xwOBA under .330.
- Sinker zone rate 40% → 50%** – arm-side edge to RHH is the whole plan; it can't start at 40% strikes.
- Pick the slider: the 85–87 version tunnels off the sinker better; the 82 sweeper gets more chase. Test both on the Edgertronic.

STRENGTH & WORKOUTS

- Maintain 93–95 and add durability: 34 AA appearances plus 2 AAA – the reliever conditioning base is there; add rotational power for the sinker to sit 94.
- Grip/forearm work for the sidearm slider – two spin rates (2,190 avg, higher on the hard one) says the hand isn't consistent.

BULLPENS & PLAN

- Sinker command pens (arm-side edge, RHH) – 50% zone target.
- Changeup pens 30% of every session until it has a shape.
- Live ABs vs LHH only – that's the only split that matters for his call-up.

Arsenal from 89 AAA tracked pitches(2 outings, July), Portland(AA)inningshave no public pitch tracking – resultsonly.
