

Sophomore year after the Georgia → Vanderbilt transfer: 13 appearances, 5 starts, 27.1 IP, 35 K (11.5 K/9) — won the starting look he transferred for, beat #21 Tennessee, and closed the year with two scoreless outings. A second Cape summer followed. Draft-eligible in 2027; the read is a 3rd–5th round arm when he’s on, and the offseason is about making bn’ the default.

2026 PROFILEno public pitch tracking at this level — results from every plate appearance; arsenal from public reports

SEASON	G/GS	IP	W-L	ERA	K	BB	NOTES
2026 Vanderbilt(So)	13/5	27.1	—	—	35	—	W vs #21 Tennessee · 2 scoreless to finish

WHAT WE NEED IN HAND BEFORE THE FIRST LAB DAY

- Vanderbilt 2026 TrackMan (spring) and Cape 2026 TrackMan — into the progression tracker
- Fall 2026 Vandy pen data as it comes in
- Video of his best and worst 2026 outings for the delivery comparison

REPORTED ARSENAL · not measured

PITCH	VELO	NOTE
Four-seam	see tracker	primary; stint-by-stint velo in the progression card
Breaking ball	see tracker	swing-and-miss pitch
Changeup	see tracker	starter's third pitch — the development piece

WHO HE WAS IN 2026

- Strikeouts are there:** 35 K in 27.1 IP at Vanderbilt after 17 K in 8.1 IP as a Georgia freshman (1.08 ERA). Swing-and-miss has followed him across two programs.
- Innings are not:** 27.1 IP in 13 games — 5 starts, but short ones (4.1 IP / 7 K vs Oklahoma State on 2/15 was the long look). A 2027 draft slot depends on a 60–80 IP season.
- Coaching read (Corbin):** ‘strong-armed, durable strike thrower’ — durability is the word to prove on the mound, not in the weight room.

- The progression tracker is his data spine:** velo, shapes, spin, extension and release stint by stint (Georgia 2025 → Cape → Vandy → Cape). That’s where ‘on’ vs ‘off’ lives.
- No public pitch tracking for college or Cape;** arsenal in the tracker is the record of note.

OFFSEASON PLAN — WHAT WE FIXevery item is tied to a 2026 number; nothing gets credited until game data confirms it

MOCAP & DELIVERY

- Winter capture is the baseline for the draft year: full delivery on Theia + force plates, plus TrackMan arsenal. Everything feeds the tracker.
- Identify the ‘off’ mechanics: compare best-stint and worst-stint deliveries if video exists.
- Physical assessment for a 6’2”/222 frame — mobility and asymmetry.

PITCH SHAPES & GRIPS

- Starter’s kit:** lock the fastball shape and build the changeup to a usable 3rd pitch (45%+ zone in pens).
- Breaking ball: define one shape and one speed so it repeats across a start, not just an inning.
- Nothing gets credited until the fall/spring game data in the tracker confirms it.

STRENGTH & WORKOUTS

- Durability block: the goal is a 70+ IP junior year. Aerobic base, arm care, and recovery habits for weekend rotation work.
- Strength maintenance over gains — he’s already a strong-armed 222; the return is in repeatability.

BULLPENS & PLAN

- Pens built as starter simulations (25–35 pitches, all three pitches, sequenced).
- Chart first-pitch strike and changeup zone% every pen.
- Live ABs in February with the tracker updated after each.

Season stats from Vanderbilt Athletics. No public pitch tracking; shape and velo history lives in the No Brand progression tracker.
